

## Recycling

At Oahu Community Recycling (OCR) our goal has been to create a community based recycling program in hopes of a cleaner Oahu. Founded in 2000, we've helped an increasing number of Oahu residents recycle with our curbside pickup service, creating a triple-win for Oahu. Our first goal is to create a win for the environment by diverting as much recyclable waste from landfills. Second, we donate 100% of all recyclables collected to the schools where they collect the redemption value to fund school programs. Third OCR has created a win for the community, providing convenient curbside recycling and creating jobs.

OCR has four major pickup areas including: Kaimuki through Waimanalo; Kailua Enchanted Lakes (including Maunawili through Kaneohe); and all areas from Ahuimanu through Waialua and Sunset Beach. We have hopes of increased pickups in these areas and of expanding to new communities throughout Oahu. In fact, our hope for the future of Oahu and OCR would be to create an island wide program. We have been working closely with the Kokua Hawaii foundation's school based 3R program for almost four years, and with the joint effort of these programs and the community, OCR hopes that island wide curbside recycling can be a reality.
